Answers Every Call

Norway People Have Found That This Is True.

A cold, a strain, a sudden wrench, a little cause may hurt the kidneys. Spells of backache often follow. Or some irregularity of the urine. A certain remedy for such attacks, a medicine that answers every call, is Doan's Kidney Pills, a true specific. Many Norway people rely on it. Here is Norway proof.

S. C. Foster, Main St., Norway, Me., says: "I have used Doan's Kidney Pills and am able to speak highly in their favor. Several years ago my kidneys began to trouble me and learning of Doan's Kidney Pills, I procured a box. It was not long after commencing their use that I felt much better. I was free from kidney trouble until recently when a cold brought on another attack. I procured Doan's Kidney Pills at Stone's Drug Store and after taking a few doses, I was relieved of every symptom of the trouble. Whenever I have taken this remedy it has never failed to help me and I therefore speak highly in its favor when an opportunity occurs." 18-19

For sale by all dealers. Price 50 cts. Foster-Milburn Co., Buffalo, New York sole agents for the United States.

"Doan you hear dat bluebird sing?"

Listen, chile!

He so glad,—he know it spring,

Full throat and day the wind,

Oh, what peace dat sort wind bring,

Soft and milt!

Seem jes lak de world gone

Brin' froze.

Winds dat make yer move so quick,

Pools all hard and thick,

But dat sun'll do de trick

Mos fore I know!

"Saw a yaller flower to-day,

Down yea road,

Standin' up and lookin' gay,

Saw az ef it waint say?

"Wintah, he done steez away?

Spec it know!

Hurd de crack or singin' loud,

Sorter hummin'?

See how full dat fish woud glow!

Watch de grass commence ter grow;

Mos believe de whole woud know

Summah's comin'!"

FREYBURG CENTER.

Jersey Breeders' Meet.

The Oxford and Cumberland Counties

Jersey Breeders' Association met at the

farm of Charles W. Farrington, Frye-

burg Center, on Wednesday, April 27.

The forenoon was spent in an informal

discussion of feeding stuffs and feeding

a cold meat dinner was served at noon.

Promptly at 12:30 p. m., President H.

W. Evans called the meeting to order in

the parlors of Mr. Farrington's com-

fortable house and a routine of business

was attended to. H. B. Eastman was

accepted to membership.

Mr. and Mrs. F. C. Shaw sent a paper

on "The St. Lambert Family of Jer-

seys," which was read. This excellent

paper briefly discussed the important

circumstances of the family and also the

care and treatment some prominent animals

received.

Some dairy problems were ably dis-

cussed by B. Walker McKee, Lecturer

of the State Grange. Mr. McKee spoke

of the opportunities for live stock

breeding in Maine, of the assistance of

local associations, and of the work of the

Dairy Division of the Department of

Agriculture. He showed the value and

need of study on the farm, and pointed

out the good results obtained by men

who put much thought in their dairy-

ing. The meeting was adjourned to the

yard where Assistant Dairy Instructor

Redman discussed the American Jersey

Cattle Club score card and then scored

three cows and a bull.

The next meeting will be held at

South Waterford, August 17.

The Lumber Camp.

It is unwritten law among the remote

lumber camps of the northern Maine

woods to leave all doors on the latch,

and to have on perpetual deposit some

fragments of food, such as a tin of soda

biscuit and a canister of tea on a shelf,

a cube of salt pork lying amid the

bottom of the barrel and sugar, pep-

per, salt and other necessities to equip a

hungry man for a good meal.

To find an ancient camp in its full

glory of beauty and song, one should

visit it in the middle of June, when barn

swallows are breeding against the rafters

and white-crowned sparrows and robins

are caring for their young in nooks and

under projecting overhangs, when squirrels

and mice are darting among the corners,

and woodpeckers and several species of

birds are making day and night

noisy in converting sap-dozed logs into

sawdust.

How's This?

We offer One Hundred Dollars Reward for

any case of Catarrh that cannot be cured by

Hall's Catarrh Cure.

Some Maxims of Mark Twain.

They are Full of Homely Wit, and of Deep

Wisdom.

"Noise proves nothing. Often a hen

who has merely laid an egg cackles as if

she had laid an asteroid."

"Training is everything. The peach

was once a bitter almond; cauliflower is

nothing but a cabbage with a college

education."

"The Autocrat of Russia possesses

more power than any other man on the

earth; but he cannot stop a sneeze."

"Habit is habit, and not to be flung

out of the window by any man, but

coaxed down stairs a step at a time."

"One of the most striking differences

between a cat and a life is that a cat has

only nine lives."

"When I reflect upon the number of

disagreeable people who I know have

gone to a better world, I am moved to

lead a different life."

"The true Southern watermelon is a

boon apud, and not to be mentioned

with commoner things. It is chief of

God over all the fruits of the earth.

When one has tasted it, he knows that

the angels eat. It was not a Southern

watermelon that Eve took; we know it

because she repented."

"Be good and you will be lonesome."

"Few things are harder to put up with

than the annoyance of a good

example."

"It were not best that we should all

think alike; it is difference of opinion

that makes horse-races."

"Even the clearest of us are most perfect

circumstances. It is likely to be at

fault, after all, and therefore ought to

be received with great caution. Take

the case of any pencil sharpened by any

woman; if you have witnessed, you will

find she did it with a knife; but if you

talk simply the aspect of the pencil, you

will say she did it with her teeth."

"April 1. This is the day upon which

we are reminded of what we are on the

other three hundred and sixty-four."

The English are mentioned in the

bible; Blessed are the meek, for they

shall inherit the earth."

"Adam and Eve had many adventures,

but the principal one was, that they

escaped teething."

"There is little trouble about special

providences namely, there is so often a

doubt as to which party was intended to

be the beneficiary. In the case of the

children, the bears and the prophet, the

bears got more real satisfaction out of

the episode than the prophet did, be-

cause they got the children."

"There is no character, however

good and fine, but it can be destroyed

by ridicule, however poor and witless.

Observe the ass, for instance; his charac-

ter is about perfect; he is the choicest

spirit among all the humbler animals,

yet see what ridicule has brought him

to. Instead of feeling complimented

when we are called an ass, we are left in

doubt."

"Consider well the proportions of

things. It is better to be a young June-

bug than an old bird of paradise."

"Why is it that we rejoice at a birth

and grieve at a funeral? It is because

we are not the person involved."

The Teeth.

The cause of the loss of the teeth—Hereditary and general influences have something to do with the durability of the teeth, as does the food of the child during the formative period of the temporary and permanent sets. But the exciting cause is chemical action due to faulty care of the mouth and teeth. Particles of food remaining on or between the teeth ferment or decompose and form acids. These acids, acting pretty continuously in badly-cared-for mouths dissolve the structure of the teeth, and after a while the nerve pulp is exposed, and then follows the full train of symptoms, pain, ulceration, abscesses, loss of teeth, etc.

For the want of care, the teeth may also be lost by the accumulation of tartar and the resulting inflammation of the gums and absorption of the sockets of the teeth. The teeth may also be injured by the use of foods which contain too much acid, or by injurious tooth preparations.

How to save the teeth.—From early childhood the habit should be formed of giving the teeth regular care. With a tooth-brush and water, and preferably tooth-powder the teeth should be cleaned carefully and thoroughly. Use a tooth-pick, a soft, smooth one, only when it is necessary to remove particles which cannot otherwise be easily removed. Clean the teeth the last thing before bedtime, and again in the morning. Clean the mouth and teeth thoroughly after every meal if possible.

How to use the tooth-brush.—The brush with bristles of uneven length is best. Rinse the mouth first with water, then use the brush with water alone. A tooth-brush and water with no tooth-powder of any kind (tooth-powder (deformed teeth) only once or twice a day. Brush all the surfaces of the teeth, especially the backs of them and the spaces between them. In brushing the teeth the gums should not be avoided; moderate friction helps to keep them healthy.

The kind of tooth-preparation to use.—There is reason to be shy of many on the market. Better ask your dentist, or be on the safe side and use nothing but some precipitated chalk or magnesia, not otherwise be easily removed. Clean the teeth the last thing before bedtime, and again in the morning. Clean the mouth and teeth thoroughly after every meal if possible.

When to see the dentist.—Do not wait until filling or extraction is necessary. Arrange with him to examine your teeth at least twice a year and advise you. It is better and cheaper for you to enlist his services in the prevention of trouble than to wait until you have the larger operations which will be harder for you and cost more.

Tonic of The Country Town.

He who has never called a country town his home has missed much. He who had his first look upon the world from some unobscured village where the world to him and held in its bounds all the people, will always lack something in his sense of his proper adjustment to creation. It is in them that the truest friendships are formed, the closest studies of human nature provided, the most lasting hold given on the eternal truths.

Only as a little child can the kingdom of earth as of that one of which it was first said. Go closer into the records of these boys off the farms and you will find that it was from the country towns, rather than the farms they came; that it was some country village that inspired the dreams, fired the hopes and prepared for that flight to broader fields. And they go back laden with gifts, not to the farms, but to the country towns to which they feel they owe so much.

Our Castles.

Many of us are building castles. Why will one seek to tear down another's handiwork? Perhaps it has been wrought with great care and precision; at least with good purpose, by the sweat of the brow, and with the best precision his hands would permit.

The foundation was designed to be of firm rock and not the sinking sands of immorality and overmuch worldliness. His castle then, was wrought with care, why try to shake it down, I ask? Why slatter his ideals? Why ask upon what creed or dogma he is building so long as it is good and will stand the test? Or why ask what church he represents. Simply this:

"My fellow being is building himself a castle with what light and strength he has given him." We are working toward that goal where all deserving ones share alike. How can we help one another? So build broad and high, from cornerstone to turret and dome, that your work may be the proof of your faith and true Christianity.

"Build these more stately mansions, O my soul!"
Look to your own castle! behold how it is shaken while censuring another! How your word makes it reel, even to its foundations.

Let alone another's work and build your own yet stronger and more beautiful, for it will not, as it is, stand the test of earthquake shocks, and the sweeping tornado.

Build over, on a stronger and surer basis. But beware! Except it be founded upon the true Rock, it cannot stand. And learn to-day what this Rock is, oh fellow mortals! ye who seek to build of wood, hay, stubble; ye who upon a fallow soil, unworked and strewn with the weeds of envy and unkindness, yielding bitter fruit, are expectant for the full fruition here and hereafter. Beware lest your castle crumble, and this, while trying to pull down another's, which was builded with care and many tears, perchance, and founded upon the Rock of Ages. And you will not even return good for good, while you are given the Divine command to do good for evil, even.

How to use the tooth-brush.—The brush with bristles of uneven length is best. Rinse the mouth first with water, then use the brush with water alone. A tooth-brush and water with no tooth-powder of any kind (tooth-powder (deformed teeth) only once or twice a day. Brush all the surfaces of the teeth, especially the backs of them and the spaces between them. In brushing the teeth the gums should not be avoided; moderate friction helps to keep them healthy.

The kind of tooth-preparation to use.—There is reason to be shy of many on the market. Better ask your dentist, or be on the safe side and use nothing but some precipitated chalk or magnesia, not otherwise be easily removed. Clean the teeth the last thing before bedtime, and again in the morning. Clean the mouth and teeth thoroughly after every meal if possible.

When to see the dentist.—Do not wait until filling or extraction is necessary. Arrange with him to examine your teeth at least twice a year and advise you. Success.

What is success in life? It is the result of doing well what God intended for you to do. Some people are continually trying to do what they were never made for.

God always fits His people for their proper work. He gives them a love for it, an interest in it, and I might say, a passion for it.

I claim that a man lowers his manhood when he takes up an occupation that is distasteful to him, for 'the sole purpose of worldly gain.

W. W. MAXIM.

FRYEBURG.

J. F. Merrill is installing a bathroom in his house.

Electric lights have been put into the new church.

Mr. and Mrs. J. K. Souther of Boston are at their summer home, Elmbank.

E. P. Weston is digging a cellar in the rear of his lot preparatory to building.

Owen C. In Vermont help ing W. O. Brown build a corn factory for the Baxter's.

T. W. Charles is building on the lot between the Argue Not and G. O. Wentworth's market.

The new piazza at the Argue Not is roomy and adds much to the appearance of the building. The Argue Not has been newly painted on the outside.

Walter Burnell, our station agent, is taking a two weeks' vacation in Harpwell, Rockland and Quebec. Charles Trombly is taking Mr. Burnell's place at the station.

Anna Barrows of Teachers' College, Columbia University, New York, will give a course of lectures before the students of Fryeburg Academy this spring. She will also conduct a series of six demonstrations. The subjects for the lectures will be as follows:

- May 2 Fundamental foods.
- 16 Foods for a day.
- 23 Diet for different ages and occupations.
- 31 Table customs.
- June 8 Question box.

Have we not heard of the stiff-necked and rebellious, and that pride comes before a fall?

Then humble yourselves before the mighty hand of God, and be wise. Seek justice and truth.

"Giving none offense in anything that the ministry be not blamed."

"All who are in Christ," or "of the household of faith," should be a safe passport, and a passport to good company and good and pleasant living, socially.

And yet, you seek to destroy the peace of mind of your fellow beings by indifference, unkind rejections and injustices, which speak more plainly than words, neglecting even to use civility who are as good as yourself, as you would be used.

You seek to rise, but you cannot, your castle totters and will some day lie crumbling and returning to dust beneath the feet—the shattered idol.

Then pause, you would hurt another with unkind and envious deeds, lest you shatter your ideal castle, while trying to pull down another's, and like the unwise man, who built his house upon the sand, you behold it fall, and great the fall of it.

Have we not all and life's petty strife, Some pure ideal of a noble life That once seemed possible?

Did we not hear the flutter of its wings, and feel it near.

And just within our reach? It was, And yet we lost it in this daily jar and fret, And now live idle in a vague regret, And with no place to turn, and it will wait, Ready for us to fill it soon or late.

No star is ever lost we once have seen, We always may be what we might have been."

JENNIE E. SNOW KIMBALL.

Insect Notes.

The Maine Agricultural Experiment Station is now mailing Bulletin 177 containing accounts of insects which have proved more or less injurious in various parts of the state the past year. The Saddle prominent, a greenish Caterpillar so destructive to beech and other deciduous trees; the Brown tail moth, a serious and wide spread orchard and forest tree pest; the Gypsy Moth and the San Jose scale recently discovered residents in the State, the Spruce and Larch Sawflies, plant lice, flies, mosquitoes and some others are briefly discussed. Of the less widely known insects, the Spindle worm injurious to elder bushes and corn, the Birch-leaf Bucculatrix so very prevalent last season feeding on the leaves of white and yellow birch that in the early fall every tree appeared infested and had a brown and scorched appearance visible even at a great distance, the Apple-leaf Sawer, a small greenish-brown leaf-feeding caterpillar, the Lesser apple worm, so common on apple trees, the only caterpillar for now, those and lung troubles that has ever been sold with the understanding that if it did not cure, it was to cost absolutely nothing.

Hyomel can be obtained at druggists everywhere and at Norway Drug Store, where guarantee it to cure catarrh, croup, sore throat, coughs and colds. A complete outfit \$1.00, which is mighty cheap for a remedy that has cured more cases of catarrh than all the catarrh specialists on earth.

Hyomel consists of an inhaler, a bottle of Hyomel, a supply of antiseptic gauze, a medicine dropper, and full instructions for use. The inhaler is made of pocket size, of hard rubber, and will last a lifetime. And best in mind that extra bottles of Hyomel, if needed, cost only 50 cents.

17&19

MIONA
Cures Indigestion

It relieves stomach misery, sour stomach, belching, and cures all stomach troubles or money back. Large bottles of tablets 50 cents. Druggists in all towns.

Women as Well as Men are Made Miserable by Kidney and Bladder Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition; beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not uncommon for a child to be born afflicted with weak kidneys. If the child urinates too often, if the urine scalds the flesh, or if, when the child reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women as well as men are made miserable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect of **Swamp-Root** is soon realized. It is sold by druggists, in fifty-cent and one-dollar size bottles. You may have a sample bottle by mail free, also a pamphlet telling all about Swamp-Root.

Home of Swamp-Root, including many of the thousands of testimonial letters received from sufferers who found Swamp-Root to be just the remedy needed. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper. Don't make any mistake, but remember the name, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

A good father who had only a limited country school education, used to ask his son to tell him about his studies, the difference between arithmetic and algebra and what he learned from chemistry. The son told me years afterwards that one of the delightful memories of his young life was in having his father question him.

Cause the children to feel you have faith in their ability. Such words help us older people, much more the boys and girls.

Furniture, Art Squares, Linoleums and Pianos

Cleaning house time is here. The Vacuum Cleaner makes it very easy. No taking up carpet, which saves labor and carpets, too. You may want something in the following: Art Squares, either Wool, Tapestry, Brussels or Velvet Rugs, either Velvet, Smyrna, Axminster or Tapestry; Linoleums, Oil Cloths or Straw Matting. PARIS HILL

Elizabeth E. Fowler of Seabrook is visiting her sister, Annie L. Paris.

Mrs. E. A. Giles and Rose M. Giles of Portland have spent a week with Mary L. Mellen.

Both of Mrs. Snow's houses, Seven Gables and Cross Roads, have been let for the summer.

Dr. Charlotte F. Hammond and Miss Leverich have returned and The Beeches will be open after May 15th.

Alfred M. Daniels has built a large addition to his livery stable and purchased a new and handsome pair of horses.

Mrs. H. E. Hammond, who has spent the winter with her daughter, Mrs. Kimball in Massachusetts, has returned home.

Beginning June 6th, the library will be open on Monday afternoon from 2 o'clock until 4.30 and on Wednesday evening from 7.30 until 9 o'clock.

Meeting at Empire Grove.

The 53d annual meeting of the directors of the Empire Campmeeting association was held at the campground, Monday, May 9, at the cottage of William K. Swan of Chelsea. A bountiful dinner was served at noon by Mrs. William Swan, consisting of beans, brown bread, cold ham, custard pie, fruits, tea and coffee, and Poland Spring water. This is the 10th year that Capt. and Mrs. Swan have served dinner to the board of directors. Those present were: Rev. J. M. Potter of Mechanic Falls, Rev. J. W. Smith of Empire, Rev. W. H. Miles of Lisbon Falls, Rev. N. K. Springer of Bethel, S. C. Ordway of South Paris, James Linn of Lewiston and Mr. Quimby of Turner.

The Grand Trunk Railway is going to own its own steamships according to a statement by a prominent official. Such a policy will result in more business for Portland.

MARRIAGES.

In Norway, May 12, by Rev. C. E. Angell, Chester Porter dated of Shelburne, N. H., and Hortense Gardner Geog. of Norway.

AYER'S HAIR VIGOR

Stops Falling Hair Destroys Dandruff

An Elegant Dressing Makes Hair Grow

Ingredients: Sulphur, Glycerin, Quinin, Sodium Chloride, Capsicum, Sage, Alcohol, Water, Perfume.

A hair preparation made from this formula is harmless, yet possesses positive merit. A hair food, a hair tonic, a hair dressing. Consult your doctor about these hair problems.

J. C. AYER COMPANY, LOWELL, MASS.

BETHEL

Isaac Morrill has lost a valuable horse.

Ida Hutchins is at the Eye and Ear Infirmary at Portland.

Helen Blabie is at Camden to drill the pupils of the high school for graduation.

Ceylon Rowe has had a "sun parlor" built on the front of his house over the front door.

Fred Tapley's horse became frightened near J. W. Chapman's and demolished his carriage.

Francina Rowe is boarding at Edward King's. Mrs. E. J. Philbrook, Mr. King's mother will have the care of her.

Launa Hall and her sister, Ellen Hall, are soon to make their home in Boston.

Rufus Rice has been delivering seed corn to the farmers. An earlier variety has been introduced.

Thursday evening the Ladies' Aid of the M. E. church gave a reception to their pastor, Rev. C. L. Banghart, and family.

Tuesday evening Hose Co. No. 1 held their annual May ball in Odoon hall. Stearns' Orchestra was in attendance. Forty couples braved the rain and spent a most enjoyable evening.

May 8 there was no preaching service at the Congregational church, the pastor being in attendance upon the State conference and later taking a two weeks' vacation in the eastern part of the State.

Some of the teachers spent Sabbath at home, here.

The school here has been making preparations for the observance of Arbor day, the 13th inst.

A beautiful illumination in the heavens about midnight, recently. We think it the effects of the comet.

Mark Swan was here the 9th inst., buying egg and chickens for his own use; also potatoes, in another place, for 25c a bushel. The writer recently paid 40c a bushel to a cheat.

Rev. Josiah Dutton of Norway, was here, recently, enroute to Haverhill. Mr. Dutton is about 88 years of age and is well preserved and shows up well that he has been a temperate Christian man all along. He is capable now of taking charge of the work on a farm and plan it well.

Supervisor Hastings visited the school here, last week. Dr. Wight was in the vicinity, recently. Dr. Twaddle visits his farm, occasionally. Z. W. Bartlett, husband of East Bethel, passed here of late, enroute to Bethel Hill. His daughter is a student at Gould's Academy.

GROVER HILL.

Don Tebbets from Locke's Mills was in the place, Saturday.

Erlander Whitman has present employment with Maurice Tyler.

Edi F. Stearns and Porter Farwell were here on business, Saturday.

Edward P. Lyon from Bethel village called on friends in the place, Sunday.

Freeland Bennett is building a chicken house for his daughter, Mrs. Maurice Tyler.

James Heaward is soon to take a vacation. He will visit relatives in Rockland and Camden for a few weeks.

BUCKFIELD.

Mrs. William Irish has been visiting her daughter, in Auburn.

Road Commissioner Damon has started work with the road machine.

Stanley Benson sold his truck horse, and purchased another in Lewiston.

Alfred Cole is so far recovered as to be out a little, though not well enough to resume his duties at the office.

The Missionary Circle of the Baptist church met with Mrs. C. M. Irish, after the meeting a picnic supper was served.

The local chapter O. E. S. worked the degree on two candidates, Friday evening, and served a banquet after the meeting.

Mr. and Mrs. H. A. Irish, who have lately returned from Florida, brought some interesting souvenirs of that region, some of the most interesting of which have been on exhibition at the shop of G. W. Tilton.

At a special town meeting it was

voted to raise \$2,500 for the purpose of remodeling or repairing the schoolhouse to meet the growing needs of the school. The selectmen were elected a committee to consider plans and to have charge of the work.

WEST MINOT.

Mr. and Mrs. Ed. Cloutier were in Welchville, Sunday.

Mrs. John Page has recently visited relatives in Auburn.

A. M. Bearce and Mrs. H. W. Bearce were at Mechanic Falls, Tuesday.

Mrs. L. B. Atherton and Mrs. Rose Atwood were in Lewiston, Saturday.

Mrs. J. R. Bearce and granddaughter, Julia Bearce, were in Auburn, Wednesday.

Mrs. H. W. Bearce and Mrs. Henry Merrill were in Lewiston, shopping, Saturday.

Walter Ross is at work for H. K. Stearns at Hebron, putting in foundations for new buildings.

Mr. and Mrs. Guy Harlow of Auburn were the week end guests of their grand-mother, Mrs. E. A. Harlow.

Mrs. L. B. Atherton of Brookton, Mass., is spending a few days with her parents, Mr. and Mrs. S. M. Atwood.

NEWRY.

Mabel Bailey, who has been ill, is now able to attend school.

There was a dance at Smith's hall, Friday evening. The attendance was small.

J. H. Little from Bethel preached at North Newry, Sunday afternoon. There was a good congregation and the sermon was very interesting.

Dr. and Mrs. J. S. Gehring of Bethel sail for Europe on the steamship Ivernia, of the Cunard line, May 10th.

South Paris.

(Continued from page 1)

The W. C. T. U. Convention.

The 24th annual convention of the Woman's Christian Temperance Union of Oxford County was held at the Congregational church, May 11 and 12. All the general officers were present, five of the local presidents and eleven of the superintendents.

The meeting opened at 10.15 with devotional services led by Mrs. B. C. Wentworth of Norway. At 11.45 the convention was called to order by the president, Mrs. E. A. G. Stickney of East Brownfield, followed by the roll call. Committees were then appointed: committee on credentials, Mrs. E. N. Chandler, Mrs. Banghart and Mrs. Lane of West Paris; committee on resolutions, Rev. Miss L. S. Macduff of West Paris, Florence Haskell of South Paris, Mrs. C. P. Barnes of Norway; committee on societies, Mrs. George Robertson of South Paris, Mrs. B. C. Wentworth of Norway. The address of welcome was given by Florence Haskell of South Paris in a few well chosen words which were briefly responded to by Mrs. Emma W. Chandler of Bethel. The new county song was sung by Mrs. Banghart, music director of the county, after which a letter was read from Isabel Shirley of New York, the composer of the county song, sending greetings to the convention. A standing vote of thanks was extended to Mrs. Shirley. Rev. I. S. Macduff offered the benediction. Reports were read by the corresponding secretary, treasurer and auditor and the meeting adjourned at 12.30.

The afternoon session opened at 2 o'clock with prayer by Mrs. T. N. Kewley. The president, Mrs. E. G. Stickney, presided. One of the most interesting points was the report of the Omaha convention. The latter address was full of encouragement and was accepted by a rising vote of thanks. At this, Mrs. Banghart rendered the popular song of victory which has been sung at many conventions, world, national, state and county. Mrs. Annie Barnes of Norway gave an excellent quiz on local temperance legion work and many suggestions of value were brought out in answer to some admirable questions.

Mrs. Effie Lambert of New York arrived on the afternoon train and was welcomed by the convention. About 200 school children, led by Lumley band, marched from the school through the village to the church, and occupied about two-thirds of the auditorium. Mrs. Lambert, wife of Dr. Z. W. Bartlett, husband of East Bethel, was original and very pleasing in regard to the use of alcoholic liquors and cigars.

The evening session opened at 7.30 with scripture reading followed by prayer, with a diet by Sue Wheeler and George Cutting, solo by Mrs. H. W. Wilson. At the close Mrs. Banghart sang the county song, by request.

The address of the evening was by Mrs. Effie Lambert of New York. She took for her subject, To the Ropes, which was interesting. She said each one should do all that they could along the temperance line and to give a long pull, a strong pull and a pull all together until there should not be a drunkard or a saloon left.

New members were received, six active and three honorary.

The meeting was adjourned until Thursday morning.

Charles Merrill of Bates college, was home over Sunday.

Helen Rogers and Florence Stiles spent Saturday in Lewiston.

Mrs. Luella Smiley was in Lewiston, where she consulted an optician.

E. H. Parlin moved his family Tuesday into the Damon house, Wheeler street.

Asa Sessions of Woodstock visited his mother, Mrs. Nancy Sessions, Thursday.

Gladye Cobb went to the Hospital Monday where she was operated on for appendicitis.

J. H. Aldrich and family moved into the house which Mr. Parlin vacated on Gothic street.

S. C. Ordway attended the Board of Directors' meeting at Poland camp ground, Monday.

Clara Blake went to Old Orchard, Wednesday morning, where she will do table work for the season.

Scott Marston went to Lewiston, Sunday, returning Monday accompanied by his wife and two children.

An adjourned meeting of the U. O. G. C. will be held at the home of Walter Dixin, next Monday evening.

Saturday's game of the High school team was with a town team and resulted in favor of the High school by the somewhat magnificent score of 15 to 14.

The second game between the Lumley Band team and Norway Grammar was played at the fair grounds, Tuesday, and this time Lumley was the winner, 3 to 2.

Rev. G. W. F. Hill of Paris Hill will deliver the annual sermon to the K. of P. of the Hiram lodge at the Baptist church, Sunday afternoon at 2.30 with exercises at Riverside cemetery at 2 o'clock.

Mrs. A. D. Cotton has gone to Lynn, Mass., and from there will go to her home in Windsor, Vt. Mrs. Cotton has spent the winter with her father, Hiram Fulsifer.

Mrs. A. H. Witham, formerly of South Paris, is in Portland last week. Witham was a member of the William K. Kimball Circle, Ladies of the G. A. R. She is survived by two sons and one daughter.

Mrs. Elizabeth Putney of North Paris has been adjudged insane and was taken to the State hospital at Augusta, last Wednesday. Newton Cummings of Paris Hill, with his auto, in company with Selectman William C. Stearns, conveyed her there.

Ipomeen Castle, No. 124, of Lewiston visited Lumley Castle, Knights of the Holy Grail, Friday evening, and worked the degree of Esquire and Knight. The work was followed by a banquet at the Methodist vestry with 44 present. Alton C. Wheeler, esq., was toastmaster.

Chandler Swift, who fell during the winter on the ice and injured his hip, went to the C. M. G. hospital for examination. It was found there was a break in the bone which had commenced to knit and it was not advisable for surgical treatment. He is now able to get about on crutches. He was assured that his condition would improve.

The selectmen have let the contract for the extension of the village sewer to Leon E. Soruton of Portsmouth, N. H. Work will be commenced in about two weeks, or sooner. Mr. Soruton put in the South Paris water works last season and is well known in this vicinity.

A portion of sewerage to be put in this year is from Bank Square out and requires considerable deep trenching.

South Paris.

(Continued from page 1)

Mrs. Lillian Swett spent Saturday in Lewiston.

Lottie and Addie Giles were in Lewiston, Saturday.

Mr. and Mrs. Mark Richardson of West Paris visited his mother, Mrs. Matilda Richardson, Sunday.

Mrs. C. L. Buck returned home Friday evening, after a two weeks' visit with her parents at Fort Fairfield.

Mr. and Mrs. Ellis McAllister have rented Mr. Blake's house on Gothic street, during the summer months.

Mr. and Mrs. Dwight Wise of Gardiner, are visiting their parents, Mr. and Mrs. George Wise, for a few days.

Several in town have purchased new automobiles. J. Hastings Bean has a new Ford, and Harry Holden, a Buick.

Sue Porter, who has been spending a week's vacation at her home, returned to Portland, Sunday, where she is teaching.

George Morton and family, who have been spending the winter in California, returned to South Paris, Tuesday afternoon.

Mr. and Mrs. Ernest Millett spent Sunday at Empire Grove, with Mrs. Millett's uncle, Capt. William R. Swan and wife.

A "by-pass" is being put in around the Cooper Spring reservoir, from a 12-inch to an 8-inch pipe. Leon E. Soruton has charge of the work.

An extension of some 350 feet of water pipe is being laid on Hill street by the Robert Gray place, to accommodate water takers in that vicinity. Mr. Soruton with a dozen or more Italians, are working on it.

Mrs. Harry Cole is gaining. Mrs. Cole some little time ago lifted a heavy weight in her arm, which she has been unable to use her arm. Mrs. Mary Daniels has been caring for her.

O. K. Clifford has sold his stand on High street, known as the Rice place, of Frank Snell who comes from the eastern part of the state. Mr. Snell will not make South Paris, his residence until his return from Europe which will probably be in about two years.

A surprise party was given on Tuesday evening, by Mr. and Mrs. Annis at their home on Western Avenue. A party of eighteen of their friends, each attired in costumes of y olden times, met at their home, bringing with them refreshments for the evening and gave Mr. and Mrs. Annis a real genuine surprise party.

Rev. R. S. Clark of the New England Home for Little Wanderers of Boston, preached at the Baptist church Sunday morning. A union service was held in the evening at the Methodist church, where he addressed a large audience.

Mr. Clark spoke rapidly and interestingly on the results of the work done in the Home. A collection was taken at this meeting for the benefit of the work.

Mrs. Mary Christholm Brown spoke at the Methodist church Sunday morning, in the interest of foreign missions in China. Mrs. Brown has a very pleasing manner and is a most enthusiastic speaker and held the closest attention of the audience. Mrs. Brown was formerly a deaconess. Her husband is a missionary in China. Mrs. Brown teaches a class of fifty boys and girls in China.

Mrs. J. H. Little and Mrs. J. S. Burbank were in Norway and South Paris last week Wednesday. They were entertained at dinner by Mrs. Theodore Thayer and during a part of the afternoon a reception was held. They were entertained at supper by Mrs. Sumner Tucker and during the evening a reception was held for old and young, and many availed themselves of the opportunity of once more meeting with their dear friends.

The evening was when a very large number of the young boys and girls who were formerly pupils in their Sunday school classes arrived and hung them. Maybaskets containing boxes of candy, one each for Mr. and Mrs. Little and Mrs. Burbank. The older ones accompanied them to the depot, where they took the nine o'clock train for their home in Bethel.

Mrs. J. H. Little and Mrs. J. S. Burbank were in Norway and South Paris last week Wednesday. They were entertained at dinner by Mrs. Theodore Thayer and during a part of the afternoon a reception was held. They were entertained at supper by Mrs. Sumner Tucker and during the evening a reception was held for old and young, and many availed themselves of the opportunity of once more meeting with their dear friends.

The evening was when a very large number of the young boys and girls who were formerly pupils in their Sunday school classes arrived and hung them. Maybaskets containing boxes of candy, one each for Mr. and Mrs. Little and Mrs. Burbank. The older ones accompanied them to the depot, where they took the nine o'clock train for their home in Bethel.

NORTH HARTFORD.

Mr. Blanchard and wife were up to the Jacobs farm, Sunday.

Alonso Oldham and J. F. Davenport visited Charlie Starbird, Sunday.

Mr. Palmer of Wilton was through the place looking after stock, Thursday.

Percy Davenport sold two yearling heifers to Angus McPherson, last week.

Julia Thorne arrived home Saturday, after making two weeks visit in Massachusetts.

The Minot Packing Co. has hired four acres of land of Mr. Blanchard to be planted to sweet corn this spring.

George Woodside of Wales was in the place, buying hogs, cows and calves. He bought a hog and beef cow of Alonso Oldham and three veal calves of J. Davenport.

WELCHVILLE.

Belle Lunt spent Saturday and Sunday in Portland, with friends.

Mr. and Mrs. William Berry of Woodford have visited with her sister, Mrs. Everett Staples.

Myra Bennett will entertain the Ladies' Sewing circle at the church vestry Saturday evening.

Stone is coming here with his tent to make pictures for a few days.

are cashed at par throughout the World. Accepted in payment of tickets, hotel service and other travel expenses. Self-identifying. Safer than money; twice as convenient: The best form of travelers' credit. We will be pleased to explain the system and supply these cheques!

THE NORWAY NATIONAL BANK OF NORWAY, MAINE

Fishing Tackle!

Would you go to a hardware store to buy a suit of clothes? Certainly not! Then why not use the same judgement when buying Fishing Tackle and go where they sell Sporting Goods, That's Waite's. He has the best and most complete line of Fishing Tackle in Oxford County and it is selling too. We are right in the way. "You don't have to walk."

I. W. WAITE, 115 Main St., Norway, Me.

HIRAM.

Elias Gould, died at his home, Tuesday afternoon, at the great age of 95 years, 11 months and 2 days. He had been quite well up to within a few days of his death.

Mr. Gould was born in Parsonsfield, May 30, 1814, and in 1841 he married Julia French of Porter and by her three children were born of whom two are living, Eunice and Melville. Julia died in 1847. Then in 1849 he married Ruth Clemons of Hiram and by her three children were born, Eli C., Julia and Samuel W. Of them only one is living, Samuel W., who is a prominent lawyer of Skowhegan.

In 1852 he was burned out in Porter, then he went to Bartlett, N. H., and from thence he moved to Hiram in 1857 and settled on the Capt. Evans farm where he lived until his death. He now lives. Then in 1864 he sold out and bought the Tim. Pierce place on the old Portland road where he has since lived. He was again burned out in 1895, losing everything he had. Afterwards, by the aid of his children, he built up a nice set of buildings just below where the old ones stood. Mr. Gould was a farmer and carpenter by trade and there are many buildings standing in town which will bring memories of him.

At the time of his last sickness he lived with his son, Melville, who administered to all his wants. The deceased was a very quiet man, a good neighbor and townsman, kind and affectionate in his home, and in politics was a staunch democrat.

Funeral was at the house, Saturday afternoon, April 10, Mr. Smith officiating. Interment was in the Spring burying ground.

Mrs. C. C. Lowell is very sick with measles.

Rev. Mr. Mead's son, Byron, is visiting Hiram people.

Cephas Wadsworth, a native of Hiram, died at Poland last week.

The roads will take a repairing now as the road superintendent is out to them.

Mrs. Eli C. Gould from Massachusetts visited her father, Elias Gould, through his last sickness.

Allen Pierce and family of Salem, Mass., are here visiting his father and mother, D. W. Pierce and wife.

George Osgood is the oldest man in town now. He is some past 90 and quite feeble but is so to be out of doors part of his time.

Frank Osgood, who went to Florida last fall and bought a farm which he sold again, arriving at Hiram last week, said it was too warm for him down there.

EAST GREENWOOD.

Mrs. Myra Lord and son, Vivian, are visiting in Mechanic Falls and Lewiston.

Mrs. Rob Clough and children of Bethel have moved to her father's, Frank Bryant's.

Leslie Kimball recently purchased a gasoline engine and has been sawing wood for his neighbors.

Scarlet Fever.

Prof. W. E. Sargent has sent out a circular to the parents and among the things he says are:

"These are the only cases of this disease in my twenty-five years of teaching here. We cannot trace the source of infection, but it must be discovered and destroyed absolutely. So at a joint meeting of Faculty and Trustees, it was decided to dismiss the school Tuesday morning for the purpose of lessening the aim in this act is to vacate every room—whether used for study, living, dining, class work, assembling or what not—and then proceed with a vigorous and thorough fumigation of every room used in any way by the school."

Meantime the students at home will have completed the required quarantine period in case any suffered infection by exposure. It is now expected students will return Thursday, May 19. This notice May 17 or 18.

The disease runs very lightly, one of the two boys ill with the disease has not been sick in bed, though the eruption is marked.

Saturday, the Trustees purchased a cottage for an Infirmary. The sick boys are there, and hereafter a hospital will be in readiness for any sick ones.

Two scarlet fever cases among the students since Saturday, Tuesday and Friday in the minds of the faculty of Hiram Academy to close the school today for ten days. In the meantime every building will be fumigated.

WEST PARIS.

Traced by a Rubber Blanket.

The Norway Savings Bank was robbed several years ago when it was in the building now occupied by the Norway Advertiser. City Marshall Heald of Portland played his part in capturing the bank burglars who had robbed it. Heald found out that the bank at Norway had been robbed and a large sum of money stolen.

He had no description of the burglars but when the Grand Trunk train got to Portland the morning after the burglary he arrested a man on suspicion. The burglar's confederates were on the train but the city marshal did not at that time know it. In this man's possession was a check for a trunk which on being opened was found to contain a half of a rubber blanket.

The other half of the blanket was found in the bank at Norway where the burglars had cut the blanket in two parts to pin up over the bank windows while they blew open the safe.

This connected the prisoner with the breaks and afterwards led to the arrest of the man's confederates in New York and they were all sent to State's prison and some of the money recovered.

Agnes Beal has been the guest of Mrs. William Stevens, Portland.

Howard Lasselle is visiting friends in Boston and vicinity this week.

The Barton Reading club met with Mrs. A. S. Kimball this week.

Mr. and Mrs. Joseph Milliken have been visiting Mr. and Mrs. John Allen at Bridgton.

Roland Thurston of Portland is spending his school vacation with his grandmother and brother in Norway.

Mrs. Charles Merrill and daughter, Doris, visited relatives in West Auburn and vicinity, a few days last week.

The road machine, six horses and a number of men began to put Main street into better condition, Monday morning.

Dr. Harry Nevins of Lawrence, Mass., was called here the past week because of the illness of his father, A. J. Nevins.

M. N. Packard of Baltimore, who has acted as relief judge in the Juvenile Court for the past two years, has been named by the Governor as an associate judge of the Juvenile Court.

Herbert P. Frost is building a large addition to his stable on Bridge street. It extends from his present stable nearly to the C. B. Cummings & Sons' storage building. Harry C. Everett is the workman.

The street sprinkler made its first appearance of the season on the street, Saturday morning. It looked bright in its new yellow coat of paint, brighter than the sun that was behind a cloud the most of the time, and rain threatened to fall and stop the sprinkler job at any minute.

Mrs. Gilbert York, a native of Norway, died at her daughter's, Mrs. Martha Brown's at Bridgton, Tuesday, May 10, at the age of 93 years. Besides her daughter Mrs. York leaves three sons, Martin and Charles of West Poland and Joseph of Lancaster, N. H. The remains were taken to Waterford for burial.

SOUTH PARIS.

Mrs. Hannah Carter of South Paris is at the Central Maine General hospital for treatment.

W. A. Nelson has a fine string of horses at the fair grounds in training for the fall races.

Mrs. Effie M. Lambert, a national organizer and lecturer of the W. C. T. U., gave a free address at Wednesday evening, May 11, at the Congregational church.

A Jail Workshop.

Oxford County will have a jail workshop, is the decision of the governor and council and that decides the matter. The county commissioners have been averse to making the addition.

RUMFORD CORNER.

Mrs. Susie Miller has returned to her home at East Rumford.

Mr. and Mrs. Joseph Jalbert visited her mother, Saturday.

Mrs. W. W. Worcester has been to Ridgville for the day.

Herbert Sargent from Rumford spent Sunday with his sister, Mrs. Stuart.

Jesse Glover of Andover visited his grandfather, George T. Farrar, Sunday.

Del Rowe, wife and two sons are visiting Mrs. Rowe's parents, Mr. and Mrs. V. D. Cole.

We are all glad to see the Dr. Stuart house open again. Mrs. Stuart came Tuesday for the season.

Our postmaster has missed three mails the past week, the longest time missed on account of illness for the past five years.

Peter Had Moved.

An old negro was accustomed to pray in a loud voice each night, "Oh, Lord, please come take po' old Pete home. He's so tired, Lord, please come take him home."

Some mischievous boys thought that they would frighten him. Just as he ended his prayer one night they dragged a heavy log across the loose boards of the porch floor.

"Who dat?" in a scared voice from Peter.

"De Lord come to take po' Peter home," answered one of the boys in a mournful voice.

"Peter don't live here. He been moved three weeks," answered poor old Peter excitedly as he blew out the candle.

Cleanliness of Ants.

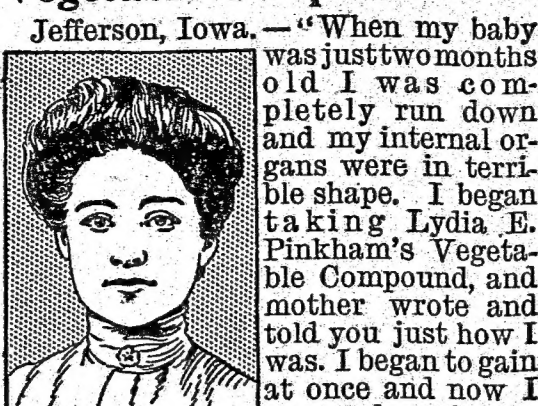

No creature is more tidy than an ant, who can not tolerate the presence of dirt on her body. These little creatures actually use a number of real toilet articles in keeping themselves clean. A well-known authority says: their toilet articles consist of coarse and fine toothed combs, hair brushes, sponges and even washes and soap. Their saliva is their liquid soap, and their soft tongues are their sponges. Their combs, however, are the genuine article, and differ from ours mainly in that they are fastened to their legs. "The ants have no set time for their toilet operations, but stop and clean up whenever they get soiled."—St. Nicholas.

The care of the shoulders of young horses is one of the most important factors to keep in mind during the first few weeks of the spring work. A horse cannot do satisfactory work with shoulders that pain him every time he takes a step.

Old riggers gates are farm robbers that get in their work almost every day in the year. You would hardly believe how much time you fool away in worrying these nuisances open and shut, besides the amount of time their frequent repairing calls for.

MADE WELL AND STRONG

By Lydia E. Pinkham's Vegetable Compound

Mrs. W. H. BURGESS, 700 Cherry St., Jefferson, Iowa.

Another Woman Cured.

Glenwood, Iowa.—"About three years ago I had falling and other female troubles, and I was nothing but skin and bones. I was so sick I could not do my own work. Within six months I was made sound and well by Lydia E. Pinkham's Vegetable Compound. I will always tell my friends that your remedies cured me, and you can publish my letter."—Mrs. C. W. DUNN, Glenwood, Iowa.

If you belong to that countless army of women who suffer from some form of female ill, just try Lydia E. Pinkham's Vegetable Compound.

For thirty years this famous remedy has been the standard for all forms of female ill, and has cured thousands of women who have been troubled with such ailments as displacements, fibroids, tumors, ulceration, inflammation, irregularities, backache, etc.

If you want special advice write for it to Mrs. Pinkham, Lynn, Mass. It is free and always helpful.

A Geographical Curiosity.

A Small Island in Two States, Three Counties and Four Towns of Interest that is shown to every summer visitor in the Kears Falls section of Maine is the small island in the river, just a short distance above the falls.

This little body of land has the unique distinction of being situated, not only in two states—Maine and New Hampshire, but in three counties and four townships.

The northeastern end of the island is in Oxford county and the southeastern end in York, both in Maine. The entire western end is in Carroll county, N. H. The island is in partly in Portland township, partly in Parsonsfield, and on the New Hampshire end is in the towns of Freedom and Effingham.

EAST MILTON.

Willie Beach has returned from a visit to his sisters at Bridgton and West Paris.

School is in session with Helen Cushman of Bryant's Pond, as teacher. She boards at Fred Bryant's.

Lewis Farnham has recently had a headstone set in the cemetery in memory of his wife, Gertrude Farnham.

Mrs. Lola Foster is among the sick ones. Herbert Buck has a very bad stomach trouble. Mrs. Fred Bryant is having serious trouble with her head, and Horace Hopkins has been sick with the measles.

Mrs. Anson C. Tuttle.

Mrs. Marian Kimball, wife of Anson C. Tuttle, died at her home at Rumford Center, Sunday, May 1. A year ago, May 7, she was married. In their new house which had been built by her husband for their occupancy, Mrs. Tuttle was only 21 years of age. She was a graduate of the Rumford High school of the class of 1907; a member of the Rumford Center M. E. church, also of the Rumford Grange.

Besides her husband, she is survived by a mother, Mrs. Pearl Kimball of Rumford Center; two brothers, Virgil Kimball of Chicago, and George Kimball of Rumford Center; and two sisters, Florence Kimball of Boston and Mrs. Juliette Clough of Lowell, Mass.

A New Superintendent.

W. H. S. Ellingwood has been chosen as superintendent of schools at Rumford to succeed H. C. Chubb. Mr. Ellingwood is a man 38 years old, married, but has no children. He graduated from Farmington Normal school in 1902; Kent's Hill Seminary in 1897; and Bates college in 1901. From 1901 to 1905 he was a teacher of sciences and mathematics in the Eastern Maine Normal at Bucksport. From 1905 to 1908, principal of the High school and superintendent of the grades at Gorham, N. H.

In 1908 he was chosen principal of the High school at Eden and later was elected superintendent of schools.

Run over by Freight Train.

While walking on the railroad track below Snow's Falls, Friday afternoon, Dan Smith was run over by a freight train. One leg was cut off below the knee. He was taken to the Maine General hospital in Portland.

He left leg was amputated. He was so badly injured internally that he died at 11.55. He was conscious only a part of the time and it was during one of these conscious moments that he told the hospital officials that his home was at St. John, N. B., where he has a father living. He was about 34 years of age.

It was the heaver that showed us the possibilities of building under water; the bee brought us the regularity in building; the birds are the oldest masters of basket-work; they, too, have furnished every inventor who has attempted to design a flying machine with his basic principle; the spiders have taught us the art of weaving and suspending; the ants have shown us how to construct ships from the fish; how to dig holes from the badger, and the frogs gave him his first swimming lessons.

We know a good woman who went with two girls all through their grammar and high school courses, not to help but for her own enjoyment and to keep her own self in touch with them. No one can tell what an inspiration it was to those girls, to have their mother be a girl with them in their school life.

The Old Oak Tree.

The extreme limit of the age of the oak is not exactly known, but sound and living specimens now compiled by the old. The tree thrives best in deep, tenuous loam with rocks in it.

Stagnant water is one of its aversions. It grows better on a comparatively poor sandy soil than on rich ground imperfectly drained. The trunk, at first inclined to be irregular in shape, straightens at maturity into a grand cylindrical shaft.

The oak does not produce good seed until it is more than six years old. The acorn is the fruit of the oak; the seed germ is a very small object at the pointed end of the acorn, with the future root uppermost.

The acorn drops, and its contents doubtless undergo important molecular and chemical changes while it lies under its winter covering of leaves or snow. In the mild warmth of spring, the acorn swells, the little root elongates, emerges from the end of the shell, and, no matter what the position of the acorn, turns downward.

The root penetrates the soil two or three inches before the stalk begins to show itself and grows upward. The "meat" of the acorn nourishes both the root and the stalk, and two years may pass before its supply of food is entirely exhausted.

At the end of a year the young oak has a root from ten to eighteen inches long, with numerous shorter roots, the longest being from six to eight inches high. In this stage it differs from the sapling. And the sapling differs from the tree. To watch these transformations under a lens is a fascinating occupation.

If an oak should be suspended in the air, with all its roots and rootlets perfect and unobscured, the sight would surely be considered wonderful. The activity of the roots represents a great deal of power.

They bore into the soil, and flatten themselves to penetrate a crack in a rock, favorably the tips turn away from the light. The growing point of a tiny outer root is back of the tip a short distance. The tip is driven on by the force behind it, and searches the soil for the easiest points of entrance. When the tips are destroyed by obstructions, cold, heat or other cause, a new growth starts in varying directions.

The first roots thicken and become leaders to support the tree, no longer feeding indirectly, but serving as conduits for the moisture and nourishment gathered by the other rootlets, which are constantly boring their way into fresh territory.

These absorb water charged with soluble earth, salts, sulphates, nitrates, phosphates of lime, magnesia and potash, which pass through the larger roots, stem and branches to the leaves, the laboratory of new growth. An oak tree may have seven hundred thousand leaves and from June to October evaporates two hundred and thirty-six times its own weight of water. Taking account of the new wood grown, we obtain some idea of the enormous gain of matter and energy from the outside universe which goes on each summer.

Oak timber is not the heaviest, toughest, or most beautiful, but it combines more good qualities than any other kind. To produce a good oak grove requires from one hundred and forty to two hundred years. It seems a long time, indeed, but forest is a perpetual branch of economics when once established.

BETHEL.

Committed Suicide.

Dr. F. P. Brown, a prominent physician in Brookline, Mass., committed suicide here Saturday forenoon. Dr. Brown, who has been living at the hotel here for some time, told his companion that he was going to the railroad station to bid good-by to some friends who were leaving by the morning train, but instead of going to the station he went to the river bank, where he shot himself through the mouth. He was living when found but died within about half an hour.

Dr. Brown has been suffering from mental troubles and has been a patient of Dr. Gehring for some time, this being his second visit to Bethel. He has kept closely to his room in the hotel and has made few acquaintances, but those with whom he has been friendly speak highly of him. He is survived by a wife, who is living in Brookline.

WILSON'S MILLS.

Fred Taylor from Newry, is in town. Two loads of Italians arrived, Saturday.

Lawrence Littlehale has been on the sick list.

Mrs. Frank Donahue was in Berlin, recently.

Mrs. Jim Shatney was working for Mrs. B. J. Johnson.

Mr. and Mrs. Cobb have moved into their cottage at the Falls.

Arthur Littlehale has gone to Colebrook, for medical treatment.

W. W. Linnell has been taking the census in town, the past week.

Mrs. Claude Jordan and daughter, are stopping at the Azaleas House.

May Fox has taken her little daughter Opal, to Win. York's, where she is at work.

Win. York, Neal McGinley and Byron Sanborn, have finished work at the Falls.

The Grangers held a dance at the Grange hall, Friday night. Ice cream and cake were sold. Proceeds, \$11.

SOUTH WATERFORD.

Several cases of tonsillitis are reported. School at Mutiny Corner seems to be progressing pleasantly so far.

Mrs. Jennie E. Kimball is expecting to entertain summer guests this season.

The strange spell of rainy weather has changed, somewhat, though it still remains cold.

Granville Fernald, who has charge of the Flag day exercises, proposes to have them held at the Mutiny Corner school house, some time in June. Further notice will be given later.

Will not the "Waterford Six" organize a Literary club for the benefit of the public, a general invitation being extended? This would be a move that would tend to improve and enrich the standard of living. There is nothing so harmful to a community as narrowness and lack of sympathy, exclusiveness which tends to create hostility rather than hospitality, deterioration rather than advancement.

The least the parent can do, is to frequently inquire of the child about his studies and how he is getting on, what he is studying and which study he enjoys the most. These things are things that they have great influence over the boys and girls.

Paint Costs Money This Year

Mixed Paints are generally selling at \$1.75 per gallon. If your buildings badly need painting, would you buy one of the Best Paints on the market for only \$1.30 per gallon?

If this interests you and if you are really after the Best Paint for the Least Money, you can readily learn how

Halley's Comet.

As comets occupy the front rank amongst those astronomical objects in which, on occasions, the general public takes an interest, and as Halley's comet, which will be visible to the naked eye, perhaps just a few words about this heavenly visitor, and about comets in general, would not be out of place.

The comet in question receives its name from Edmund Halley, an English astronomer, who, upon the discovery of the law of gravitation by Sir Isaac Newton, evolved the theory that comets move in fixed orbits like planets, and he proved his theory by calculating the exact orbit of the comet which now bears his name, predicting its return about thirty days after the date of its return, which was in March, 1759. Its next appearance, November, 1835, was computed, under improved methods, by a French, (and also by a German) astronomer, and the comet arrived within three or four days after the time of its prediction. It is hoped, and it is also probable, that its next return—which will be about the middle of April, 1910, has been calculated to within 24 hours.

This comet has a period of about 75 years, but is subject to accelerations and retardations due to the attractions of the planets, which might make its period anywhere from 74 to 79 years, and to compute a close approximation of its return to perihelion becomes a problem of great intricacy and painstaking thoroughness. Some have been prompted by their romantic fancy to call this celestial visitor the Star of Bethlehem, claiming that its first appearance presaged the birth of the Great Physician. Its first recorded appearance seems to have been about the year 12 B. C.

It is not so very many years ago that comets were looked upon with a pronounced terror, as portending national disaster; war, famine; the death of Kings or some other dire calamity. This is made apparent by numerous ancient authors, and by none more forcibly than Shakespeare. For instance, in Julius Caesar we have a passage as follows:

"When beggars die there are no comets seen, The Heavens themselves blaze forth the death of princes."

In Henry VI, in Hamlet, and in the Taming of the Shrew, we find similar references to the ill omen of comets. In Milton's Paradise Lost, a comet is spoken of as sending pestilence and war. But modern science has dissipated all superstition with which, in earlier ages, the advent of a comet was regarded. They are no longer considered to be forerunners of impending calamity except by those who are still in bondage to superstition.

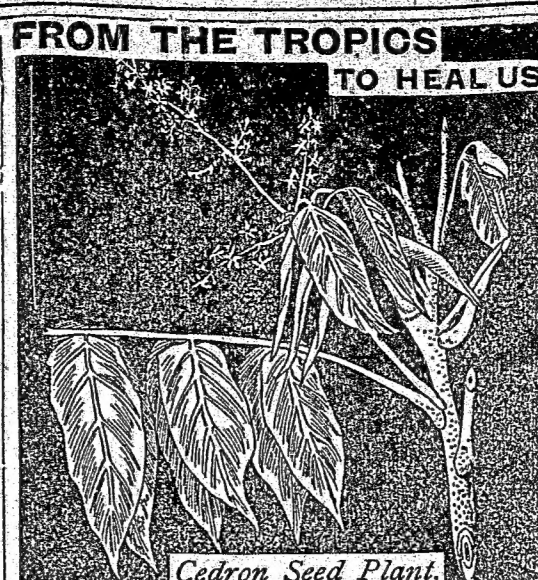

There is, however, a wide-spread apprehension—and it is not to be wondered at—as to what would happen in case a comet should strike our earth. But there is no reason to fear a collision between a comet and the globe on which we live. While no one really knows what a comet really is, it is generally admitted by astronomers that the total amount of matter in a comet is exceedingly small, in consequence of which they must be decidedly impalpable. The spectroscopic evidence is to the effect that the nucleus of a comet is certainly the presence of hydrocarbon and other gases in comets, and it is possible that they consist of widely scattered particles of cometary matter, each surrounded by gas.

That the tail of a comet has no appreciable solidity is proven by the fact that the brilliancy of the faintest star is to no noticeable extent diminished when a comet passes over it. The star is seen quite as well through the comet as it would be if the comet were entirely out of the way. Therefore, whatever might be the effect on a comet if it were to strike the earth, the effect on the earth, were it struck by a comet, would probably not be serious. The mathematical chances of a collision between the earth and Halley's comet during its coming visitation are probably less than one in many millions, a small chance indeed; but we are not living under conditions of chance such as Hated dreamed of, but under conditions of design and immutable law which emanated from an All-powerful Creator.

What has happened to Halley's comet during the past seventy-five years, no one knows; its tail may have lessened in length, but it will be the same great comet, a brilliant sight in the heavens, with a tail probably forty million miles long.

Comets exhibit various unaccountable peculiarities, one of the most interesting of which is the invariable direction of their tails away from the sun. A comet will rush head foremost toward the sun, but after it has turned that fiery globe, it proceeds tail first. This characteristic direction of a comet's tail is probably due to the repulsive force of the sun's heat or light.

Comets are often regarded as being no part of the solar system; but they are controlled by the same laws, and owe their existence and motions to the same

In Central America many natives are gathering these seeds of this plant, Cedron Seed, a rare medicine that has valuable curative powers. But few drug stores carry this seed, owing to the high cost of the article.

This country is a large consumer of this costly seed because it enters into the famous catharr remedy, Perna, sold the world over.

causes that the planets do. They have but little density, and their orbits are decidedly elliptical. The periodic time of some of them is but a few years, while that of others covers centuries. They shine partially by their own, and partially by reflected light. They enter the solar system from every side, and at every angle with the plane of the ecliptic. Their brilliancy increases rapidly from the time they are first seen until they have turned the sun, and then their light diminishes as they pass into outer cold and darkness. Usually, a comet has a tail; but sometimes the tail is missing, and occasionally they have five or six tails.

The head of a typical comet contains as its brightest part what is called its nucleus, and in which the material of the comet seems to be much more dense than elsewhere. Surrounding the nucleus is a quantity of luminous material from twenty thousand to one million miles in diameter, called the coma; the nucleus and coma making up the head, from which the tail streams away, sometimes to a distance of two hundred million miles.

On June 30, 1801, the earth passed into and through the tail of a great comet of that year at about two-thirds of its distance from its nucleus, with no noticeable dynamic result, and nothing to indicate danger from asphyxiation.

Halley's comet has been recorded to have shown itself to the world no less than 25 times. It was this same misty visitor that was shown over Europe in April, 1066, and was considered the forerunner of the conquest of England by William of Normandy. To read the history in detail of this celebrated comet would require a great deal of time, but it would, nevertheless, be decidedly interesting to one who takes kindly to such literature.

In round numbers about five hundred comets visible to the naked eye have been recorded since the Christian era, and probably an equal number of telescopic comets have been observed since the invention of the telescope. Some authorities estimate the number belonging to our solar system by millions; consequently these heavenly rockets are not to be considered of rare occurrence. It may be taken as a fact, though of course not as a rule, that a bright and conspicuous comet comes about once in ten years, and one of remarkable brilliancy, or specially conspicuous in some respect, every thirty years.

Those who have calculated the orbit of Halley's comet for its coming return are more at fault than is likely, it will reach its perihelion, or nearest approach to the sun, on April 18, 15 hours G. M. T., at which time it will be about 65 million miles from the sun. About May 18th, it will pass between the sun and the earth, a distance of about 13 million miles separating them, and if its tail is more than 12 million miles long, and it takes, certainly, it will envelop the earth.

The speed with which we will pass through the tail of this comet is enormous. The comet will be moving toward the east with a velocity of thirty-two miles per second, and the earth will be moving toward the west with a velocity of eighteen and one-half miles per second, the sum of both motions amounting to over fifty miles per second.

Halley's comet will be visible to the naked eye—first before sunrise, and then after sunset—for a number of days before and a number of days after it has paid its dignified respects to the sun, at which time it will be in the zodiacal sign of Aquarius. This comet travels a distance of about seven billion miles during its period of about seventy-five years.

GILEAD.

The Gray family, glass blowers, have been giving entertainments in town.

G. H. Coffin, who has been seriously ill, is now out driving his automobile.

Milan R. Bennett, wife and child have gone to Portland.

Mrs. J. W. Bennett, who has spent the winter in Portland, has returned to Gilead.

Cookery and Business.

A New York woman, who has mastered bookkeeping and stenography and is earning her own livelihood, writes to one of the newspapers to ascertain where she can learn to cook.

Evidently she is a sensible girl. If the right young man comes along, she will be ready to go into the business of running a flat. Merely because she now has to support herself by writing figures in a book and hammering the keys of a typewriter is no reason why she should not fit herself to manage a home of her own.

Perhaps her letter calls attention to a lack in the means provided for self supporting young women who seek improvement and recreation. The gymnasium and lecture hall are easily accessible, but the evening cooking school is harder to discover.

Had the young girl who wrote to the newspaper wanted to study drawing or languages in her leisure hours, no letter would have been needed. But in all this is published about the undertakings to help young women help themselves, nothing is said about cooking schools for bookkeepers and stenographers.

Yet a majority of the girls in the business offices will marry after some years spent in bookkeeping, dictation, or keeping books. What better thing could be done for them than to open the door of the evening school of domestic economy?

An increased knowledge of cooking might not be the least of the factors in decreasing the business of the divorce courts.

EAST HIRAM.

Will and Norman York moved from the Thwing house to Charles Bean's rents.

Mrs. J. A. Warren has been entertaining her sister, Mrs. W. B. Twitchell, of South Portland.

H. Louise Flint has returned from a "day's" visit with her sister, Mrs. N. E. Rankin, and family of Woodford.

Neil McDonald has moved to the E. P. Thwing house on Hancock avenue, recently purchased by Mrs. Lydia Gilman of Mrs. Ruth Cole.

Ev e Hans n passed her vacation with her father, E. K. Hanson, and family, and has gone to St. Johnsbury, Vt. She will spend some time there in the family of Rev. Peter Black, who was transferred from Gorham at the recent session of Maine Conference.

Rev. Dr. Snell from the eastern part of the State preached at the Congregational church, Sunday, May 1. At the business meeting that followed it was voted to give him a call to become pastor of the church, connected with the church of Denmark—his residence to be in Denmark.

Previous to 1800, tallow dips and wax candles were the only sources of light; then came gas lighting and about 1850 the oil lamps came, becoming very widely used in the cities. In 1870 the first gas light was used in a lighthouse and later they were used for street illumination. The incandescent lamp was discovered by Edison in 1880, and the latest development in electric lighting, the new metal filament lamps, is only about a year old.

"Now the young tre's sway with quickening grace," And the leaflets open one by one, And the blossom lifts its lovely face, And spring is hastening on apace. "Neath the downward glance of the sun."

Food Experts Point to France

Food authorities of America are creating a stir by holding up to this country the example furnished by France. These experts declare that France has struck the keynote in cutting down the high cost of living by consuming a greater amount of flour products and cutting down on meat. They base their recommendations upon the fact that the people of France constitute the healthiest and most prosperous nation in the world.

It is a well known fact that the lower a human being is in the scale of intelligence the less bread he eats, this point being evidenced by the fact that while our eating habits, throughout the world's history, marked the advance of civilization, it is pointed out that no savage eats bread.

While living has practically trebled in cost in the last 10 years, the price of flour has advanced only slightly. On the cheapness of flour the American food experts base their contention that greater consumption of flour will lower the high cost of living tremendously. Besides being the cheapest food product on the market today, flour made into bread contains 60 per cent more nutriment than meat. Flour is marketed at the nearest cost of raw material of any known food product, the miller's profit seldom exceeding two per cent of the cost of the raw material and manufacture.

In support of their arguments of a greater consumption of flour by American families, food experts declare that France consumes twice the amount of wheat flour per capita that America does. Also it is pointed out that bread and milk and milk toast are most nearly the ideal of a perfect diet for human beings and will sustain the body in perfect physical condition longer than any other single diet. The fact that the cheapness of flour will cause a reduction in the high cost of living is also pointed out in a strong vein by President John W. Burk, of the Ansted & Burk Company, of Springfield, Ohio, who produce the famous William Tell Flour, the wholesomeness and purity of which are insured to the American housewife by a special guarantee.

Mr. Burk declares that already his company is noticing the tendency among consumers of the William Tell Flour to use more wheat flour and eat less meat. While this in a large measure is due to the perfect satisfaction which this flour gives for the baking of bread, biscuit, cake and pastry, Mr. Burk believes that the next year will see a large increase in the consumption of flour in this country.

He declares that there is not, nor never can be a flour trust, and he bases his statement upon the table of prices now in vogue, and states that this comparison is greater than shown, as all the prices except flour, in the table, are 50 to 100 per cent greater than indicated. Following is the table of prices he presents:

Eggs per doz.	24c
Beef per lb.	12c
Mutton per lb.	15c
Milk per qt.	12c
Fork per lb.	12c
Cheese per lb.	15c
Butter per lb.	15c
Rice per lb.	8c
Potatoes per bu.	60c
Beans per lb.	8c
Flour per lb.	30c

The Boston Sunday Journal Makes an Innovation.

On last Sunday, May 8, The Boston Sunday Journal made a decided innovation in the field of Sunday Newspapers. The issue of that date was a straight newspaper, giving all the news, but not sending out any comics or any of the so-called freak or special features common to the conventional Sunday paper. The Price of The Boston Sunday Journal, moreover, is a novelty. It sells for one cent, the same as every other day.

To the man who wishes to get the news of Saturday afternoon and evening, often the most eventful part of the week, The Boston Journal will come as a welcome relief from the six-page bulky paper he is forced to buy now.

The follower of athletic sports, the financial world, the woman of the home, all receive attention, and find the events that interest them carefully covered.

The Boston Sunday Journal comes to fill a long felt need. It marks a return to simpler conditions and already its coming has met with approval from readers in all walks of life.

Write for liberal sample to THE "L. F." MEDICINE CO., Portland, Me.

DOLL CARRIAGE FREE

This splendid Dollie, Scott's, painted dark green or mahogany with suitable trimmings; upholstered in rich leatherette; fitted with rubber-tired wheels and metal framework standing 37 inches high with a seat of 28 inches, is one of our MAGNIFICENT PREMIUMS which we give for introducing our choice products, Tea, Coffee, Extracts, etc. Any little girl or her mother can easily earn this great big carriage. A complete set of our premiums are Dollie, Express Wagon, Clock, Baseball, Tennis Racket, etc. Write for them to your dealer or to us. Send a note for our Dollie and we will prove to you that we are the most liberal premium house in the world. Do not confuse us with any other concern, but drop a postal card to Atwood's Medicine Co., 25 Exchange St., Lynn, Mass., Dept. 2.

Purest Flour

"Of the various qualities of flour obtained from the same wheat, the lower grades are those most contaminated with grease, dirt, and objectionable bacteria; the freedom of flour from these, increases with its purity."

Prof. W. J. AGO, the well-known English chemist.

The purity of William Tell flour is due to the costly equipment and exceptional care to keep the grain and flour clean.

The wheat is stored in hermetically sealed tanks at the big mills of Ansted & Burk Co.

Before grinding, it is cleaned six times.

Neither grain nor flour ever touches anything but the bright, clean surfaces of dust-proof machinery. Even the flour bags are sewed up by machinery.

William Tell comes to you from the mills with all the brilliant bloom that only Ohio wheat can make.

Ask your dealer, and insist on having—

William Tell C. B. CUMMINGS & SONS.

Woodworking Plant FOR SALE

Centrally located in Norway Village, Maine, up-to-date shop, well equipped with machinery for manufacturing builders' supplies, jobbing, etc.

On account of impaired health I offer the above property for sale at a bargain.

A rare opportunity to step into a well established business.

17th C. H. ADAMS.

PROBATE NOTICES.

To all persons interested in either of the Estates hereinafter named.

At a Probate Court held at Paris, in and for the County of Oxford, on the twentieth day of April, in the year of our Lord one thousand nine hundred and ten. The following matter having been presented for the action thereupon hereinafter indicated; it is hereby ORDERED:

That notice thereof be given to all persons interested, by causing a copy of this order to be published three weeks successively in the NORWAY ADVERTISER, newspaper published at Norway, in said County, that they may appear at a Probate Court to be held at said Paris on the third Tuesday of May, A. D. 1910, at 9 o'clock in the forenoon, and be heard thereon if they see cause.

ELEONORA N. BROWN, late of Norway, deceased; petition for order to distribute balance remaining in her hands presented by Ellen F. Brown, administratrix.

HERBERT A. FLETCHER, late of Conway mark, deceased; petition to sell and convey real estate presented by Cecil M. Fletcher, administratrix.

DAVID W. BRIMS, late of Woodstock, deceased; petition that a sum of money be set aside for perpetual care of lot in cemetery from said estate, presented by David R. Woodbury, Administrator.

AMOS HALEY late of Fryeburg, deceased; will, codicil and petition for probate thereof presented by Edward E. Hastings, the executor therein named.

JAMES M. ELLIOTT late of Porter, deceased; will and petition for probate thereof presented by Melissa A. Elliott, the executrix therein named.

SARAH N. STICKNEY late of Brownfield, deceased; will and petition for probate thereof presented by Mary E. Spring, the executrix therein named.

YATUGH N. NUTTER late of Stoneham, deceased; petition that Fernando R. McAllister, administrator of the estate of said deceased, be removed from said office, and that Rebecca Miliken, grandmother of said deceased, be appointed administratrix in her stead; petition for determination of collateral inheritance tax presented by William F. Jones, Administrator.

ADDISON E. HERBICK, Judge of said Court. A true copy—attest: 17-18 ALBERT D. PARK, Register.

DECORATE

Sired By Dare Devil, 2.09.

Black stallion, 16 hands, weighs 1200 lbs. Dam, Jewel, by Almont, dam of Lord March 2.11 1-2, Diamond Kind 2.19 1-4, Point Dexter 2.21 1-2. Will stand at the stable of W. J. WHEELER at \$25.00 to warrant. Send for catalogue.

COUNT DIRECT

Trial 2.18. Sired By Direct Hal, 2.04 1-4

Dam, Countess; by Mambrino King, black stallion, 15.2 1-2 hands, 1025 lbs. Count Direct, a son of Direct Hal 2.04 1-4 and The Countess, by Mambrino King attracted the attention of our thoughtful breeders to him as a sire, through the performance of the three year old filly, Countess Chimes last season. She was the first of her get to be trained. She showed quarters in 33 seconds. There were days last fall when she could have shown a full mile in 2:20 or better. That she impressed others as being a fast trotting filly, will add that Walter Cox of Dover, N. H. bought her of Geo. Bonnalite last fall. That fact alone is no small compliment to Count Direct.

Will stand at the stable of W. J. WHEELER at \$25.00 to warrant. Send for full pedigree.

W. J. WHEELER, South Paris, Me.

Halley's Comet.

As comets occupy the front rank amongst those astronomical objects in which, on occasions, the general public takes an interest, and as Halley's comet will soon be visible to the naked eye, perhaps just a few words about this heavenly visitor, and about comets in general, would not be out of place.

The comet in question receives its name from Edmund Halley, an English astronomer, who, upon the discovery of the law of gravitation by Sir Isaac Newton, evolved the theory that comets move in fixed orbits like planets, and he proved his theory by calculating the exact orbit of the comet which now bears his name, predicting within about thirty days the correct date of its return, which was in March, 1759. Its next appearance, November, 1835, was computed, under improved methods, by a French, (and also by a German) astronomer, and the comet arrived within three or four days after the time of its prediction. It is hoped, and it is also probable, that its next return—which will be about the middle of April, 1910, has been calculated to within 24 hours.

This comet has a period of about 75 years, but is subject to accelerations and retardations due to the attractions of the planets, which might make its period anywhere from 74 to 79 years, and to compute a close approximation of its return to perihelion becomes a problem of great intricacy and painstaking thoroughness.

Some have been prompted by their romantic fancy to call this celestial visitor the Star of Bethlehem, claiming that its first appearance presaged the birth of the Great Physician. Its first recorded appearance seems to have been about the year 12 B. C.

It is not so very many years ago that comets were looked upon with profound terror, as portending national disaster; war, famine; the death of Kings or some other dire calamity.

This is made apparent by numberless ancient authors, and by none more forcibly than Shakespeare. For instance, in Julius Caesar we have a passage as follows: "When beggars die there are no comets seen, The Heavens themselves blaze forth the death of princes."

In Henry VI. in Hamlet, and in the Taming of the Shrew, we find similar references to the ill omen of comets. In Milton's Paradise Lost, a comet is spoken of as sending pestilence and war. But modern science has dispelled the superstition with which, in earlier ages, the advent of a comet was regarded. They are no longer considered to be forerunners of impending calamity except by those who are still in bondage to superstition.

There is, however, a wide-spread apprehension—and it is not to be wondered at—as to what would happen in case a comet should strike our earth. But there is no reason to fear a collision between a comet and the globe on which we live. While no one really knows what a comet really is, it is generally admitted by astronomers that the total amount of matter in a comet is exceedingly small, in consequence of which they must be decidedly impendable.

The speed with which they move is so great that they are able to pierce a certain amount of the atmosphere and other gases in comets, and it is possible that they consist of widely scattered particles of cosmic matter, each surrounded by gas.

That the tail of a comet has no appreciable solidity is proved by the fact that the brilliancy of the faintest star is to no noticeable extent diminished when a comet passes over it. The star is seen quite as well through the tail of the comet as if the comet were entirely out of the way. Therefore, whatever might be the effect on a comet if it were to strike the earth, the effect on the earth, were it struck by a comet, would probably not be serious.

Comets exhibit various unaccountable peculiarities, one of the most noticeable of which is the invariable direction of their tails away from the sun. A comet will rush head foremost toward the sun, but after it has turned that fiery goal, it proceeds tail first. This characteristic direction of a comet's tail is probably due to the repulsive force of the sun's heat or light.

Comets are often regarded as being no part of the solar system; but they are controlled by the same laws, and owe their existence and motions to the same

Stop That Cough or it will surely Stop You

We don't mean just stop the irritation in your throat—but cure the underlying cause.

Cough-syrups cannot do this. It takes a constitutional tonic body builder to do the work properly—and cure you to stay cured.

If we cannot stop that cough with VINOL—our delicious cod liver and iron tonic—which is made without oil—we will not charge you a cent for the medicine you buy. This seems like a pretty fair proposition—and ought to be accepted. Don't you think so? With this understanding we ask you to try it.

FRANK P. STONE, DRUGGIST
NORWAY.

In Central America many natives are gathering the seeds of this plant, Cedron Seed, a rare medicine that has valuable curative powers. But few drug stores carry this seed, owing to the high cost of the article.

This country is a large consumer of this costly seed because it enters into the famous catarrh remedy, Fernna, sold the world over.

causes that the planets do. They have but little density, and their orbits are decidedly elliptical.

The periodic time of some of them is but a few years, while that of others covers centuries. They shine partially by their own, and partially by reflected light. They enter the solar system from every side, and at every angle with the plane of the ecliptic. Their tails increase rapidly from the time they are first seen until they have turned the sun, and then their light diminishes as they pass into outer cold and darkness. Usually, a comet has a tail; but sometimes the tail is missing, and occasionally they have five or six tails.

The head of a typical comet contains as its brightest part what is called its nucleus, and in which the material of the comet seems to be much more dense than elsewhere. Surrounding the nucleus is a quantity of luminous matter from twenty thousand to one million miles in diameter, called the coma; the nucleus and coma making up the head, from which the tail streams away, sometimes to a distance of two hundred million miles.

On June 30, 1861, the earth passed into and through the tail of a great comet of that year at about two-thirds of its distance from its nucleus, with no noticeable dynamic result and nothing to indicate danger from asphyxiation.

Halley's comet has been recorded to have shown itself to the world no less than 25 times. It was this same misty visitor that was shown over Egypt in April, 1066, and was considered the forerunner of the conquest of England by William of Normandy. To read the history in detail of this celebrated comet would require a great deal of time, but it would, nevertheless, be decidedly interesting to one who takes kindly to such literature.

In round numbers about five hundred comets visible to the naked eye have been recorded since the Christian era, and probably a large number of late comets have been observed since the invention of the telescope. Some authorities estimate the number belonging to our solar system by millions; consequently these heavenly rockets are not to be considered of rare occurrence. It may be taken as a fact, though of course not as a rule, that a bright and conspicuous comet comes about once in ten years, and one of remarkable brilliancy, or specially conspicuous in some respect, every thirty years.

Those who have calculated the orbit of Halley's comet for its coming return are more at fault than is likely, it will reach its perihelion, or nearest approach to the sun, on April 18, 15 hours, 11.2, at which time it will be about 95 million miles from the sun. About May 18th, it will pass between the sun and the earth, a distance of about 18 million miles separating them, and if its tail is more than 12 million miles long, and it almost certainly is, it will envelope the earth.

The speed with which we will pass through the tail of this comet is enormous. The comet will be moving toward the east with a velocity of nearly 100 miles per second, and the earth will be moving toward the west with a velocity of eighteen and one-half miles per second, the sum of both motions amounting to over fifty miles per second.

Halley's comet will be visible to the naked eye at first before sunrise, and then after sunset—for a number of days before and a number of days after it has paid its dignified respects to the sun, at which time it will be in the zodiacal sign of Aquarius. This comet travels a distance of about seven billion miles during its period of about seventy-five years.

GILEAD.

The Gray family, glass blowers, have been giving entertainments in town.

G. H. Coffin, who has been seriously ill, is now out driving his automobile.

Millan R. Bennett, wife and child have gone to Portland.

Mrs. J. W. Bennett, who has spent the winter in Portland, has returned to Gilead.

Cookery and Business.

A New York woman, who has mastered bookkeeping and stenography, and is earning her own livelihood, writes to one of the newspapers to ascertain where she can learn to cook.

Evidently she is a sensible girl. If the right young man comes along, she will be ready to go into the business of running a flat. Merely because she now has to support herself by writing figures in a book and hammering the keys of a typewriter is no reason why she should not fit herself to manage a home of her own.

Perhaps her letter calls attention to a lack in the means provided for self supporting young women who seek improvement and recreation. The gymnastic and lecture hall are easily the evening cooking school is harder to discover.

Had the young girl who wrote to the newspaper wanted to study drawing or languages in her leisure hours, no letter would have been needed. But in all that is published about the undertakings to help young women help themselves, nothing is said about cooking schools for bookkeepers and stenographers.

Yet a majority of the girls in the business offices will marry after some time spent in studying dictation or keeping books. What better thing could be done for them than to open the door of the evening school of domestic economy?

An increased knowledge of cooking might not be the least of the factors in decreasing the business of the divorce courts.

Will and Norman York moved from the Thwing house to Charles Bean's reus.

Mrs. J. A. Warren has been entertaining her sister, Mrs. W. B. Twitchell, of South Portland.

H. Louise Flint has returned from a few days' visit with her sister, Mrs. N. E. Rankin, and family of Woodford.

Neil McDonald has moved to the E. P. Thwing house on Hancock avenue, recently purchased by Mrs. Lydia Gilman of Mrs. Ruth Cole.

Ev e Hans n passed her vacation with her father, E. K. Hanson, and family, and has gone to St. Johnsbury, Vt. She will spend some time there in the family of Rev. Peter Black, who was transferred from Gorham at the recent session of Maine Conference.

Rev. Dr. Snell from the eastern part of the State preached at the Congregational church, Sunday, May 1. At the business meeting that followed, it was voted to give him a call to become pastor of the church, connected with the church of Denmark—his residence to be in Denmark.

Previous to 1800, tallow dips and wax candles were the only sources of light; then came gas lighting and about 1850 the oil lamps came, becoming very widely used in the States. In 1878 the first arc light was used in a lighthouse and later they were used for street illumination. The incandescent lamp was discovered by Edison in 1880, and the latest development in electric lighting, the new metal filament lamps, is only about a year old.

"Now the young tree's sway with quickening grace,
And the leaflets open one by one,
And the blossom lins its lovely face,
And spring is hastening on apace."
Neath the downward glance of the sun."

Food Experts Point to France

Food authorities of America are creating a stir by holding up to this country the example furnished by France. These experts declare that France has struck the keynote in cutting down the high cost of living by consuming a greater amount of flour products and cutting down on meat. They make their recommendations upon the fact that the people of France constitute the healthiest and most prosperous nation in the world.

It is a well known fact that the lower a human being is in the scale of intelligence the less bread he eats, this point being evidenced by the fact that while our eating has, throughout the world's history, marked the advance of civilization, it is pointed out that no savage eats bread.

While living has practically trebled in cost in the last 10 years, the price of flour has advanced only slightly. On the cheapness of flour the American food experts base their contention that greater consumption of flour will lower the high cost of living from today. Besides bread, flour contains more nutriment than meat. Flour is marketed at the nearest cost of raw material of any known food product, the miller's profit seldom exceeding two percent of the cost of the raw material and manufacture.

In support of their arguments of a greater consumption of flour by American families, food experts declare that France consumes twice the amount of wheat flour per capita that America does. Also it is pointed out that bread and milk and milk toast are most nearly the ideal of a perfect diet for human beings and will sustain the body in perfect physical condition longer than any other single diet.

The fact that the cheapness of flour will cause a reduction in the high cost of living is a strong vein in the argument of the flour men. President John W. Burk, of the Ansted & Burk Company, of Springfield, Ohio, who produces the famous William Tell Flour, the wholesomeness and purity of which are insured to the American housewife by a special guarantee.

Mr. Burk declares that already his company is noticing the tendency among consumers of the William Tell Flour to use more wheat flour and eat less meat. While this in a large measure is due to the perfect satisfaction which this flour gives for the baking of bread, biscuit, cake and pastry, Mr. Burk believes that the next year will see a large increase in the consumption of flour in this country.

He declares that there is not, nor never can be a flour trust, and he bases his statement upon the table of prices below, and states that this comparison is greater than shown as all the prices except flour, in the table, are 50 to 100 per cent greater than indicated. Following is the table of prices he presents:

The Boston Sunday Journal Makes an Innovation.

On last Sunday, May 8, The Boston Sunday Journal made a decided innovation in the field of Sunday Newspapers. The issue of that date was a straight newspaper, giving all the news, but not sending out any comics or any of the so-called freak or special features common to the conventional Sunday paper. The Price of The Boston Sunday Journal, moreover, is a novelty. It sells for one cent, the same as every other day.

To the man who wishes to get the news of Saturday afternoon and evening, often the most eventful part of the week, The Boston Journal will come as a welcome relief from the daily page busy papers he is forced to buy now.

The follower of athletic sports, the financial world, the woman of the home, all receive attention, and find the events that interest them carefully covered.

The Boston Sunday Journal comes to fill a long felt need. It marks a return to simpler conditions and already its coming has met with approval from readers in all walks of life.

BUSINESS SPECIALS.

Under this head business notices inserted for ten cents per line. Eight words to the line.

Next car load horses from Iowa will arrive Friday, May 25. Price \$100 and over. Write to J. B. Parmenter, optometrist, will have the latest thing in high power prism telescopes ready to take orders. Write to J. B. Parmenter, May 25, at P. M., and each night as long as the comet is in sight.

We supply fire to our amateur customers a handy device for roll films to be developed. Write for them to the Cottage Studio, Norway, Maine.

Get your ticket now, before they are all sold. 6 observations for 25c, at Parmenter's.

New books at Noyes Drug Store.

29 cents Saturday Candy at Stone's every Saturday. Why pay more elsewhere?

We are coming, Hersey's Tomato Plants.

Stone's hammocks are better and cheaper this year than ever. Blame the comet.

New wall papers at Noyes Drug Store.

Get that big trout last last year. See Stone's for fishing tackle.

Ice cream and cake will be served at Internisals after 10c each; dancing 50c per couple; spectators 10c. All dances invited to the social dance at Grange Hall, Friday evening, May 27th.

Bicycle supplies at Otto Schuener's, Main St.

Faints and oils at F. P. Stone's.

Upholstering done by Mattresses made over at Otto Schuener's, Main St.

Largest variety of room paper at Stone's.

NORWAY AND VICINITY.

Alarm from Box 35.

The fire alarm from Box 35 was rung in Tuesday noon for a fire in the sales stable of H. F. & E. E. Andrews on Main street.

The fire broke out in the office which is at the left of the double door. It is not known how it started as no one was in the room at the time but it is thought from indications that it was started from a pipe or a cork. The prompt work of those in the vicinity extinguished the fire so that the fire company did not have to put the streams on. The damage was slight. Had the fire broken through the floor above where the hay is it would have done a lot of damage.

It was only a year ago last August that the Andrews family lost their buildings by fire for the second time, the first being in the big fire of 16 years ago.

Star Course Final Number.

Next Wednesday evening at the Opera House the closing number of the Star Course will be given. The Apollo Male Quartet is one of the best and most widely popular male quartets on the concert platform. The Boston Carnival Company will give their brilliant spectacular entertainment with the classic posings, illusions and kaleidoscope of light, while in addition Geo. B. Outler, the singing humorist, will present some features of his work. The local committee appeals to the public for a large attendance at this concert.

Base Ball Season Opens.

Don't forget the opening of the base ball season at the Fair grounds, Saturday, May 21. There will be two games; first that between the Mobawks of Portland, one of the strongest teams in the State, and the Radcliffe at 2 o'clock, and the second game between the Norway High and Paris High. The Radcliffe will put the regular team in the field. With good weather there will be a big crowd in attendance; quite a number from the surrounding towns are planning to attend. Get a score card at the gate and keep tabs on the game.

Victor Mason and family have moved to Stoneham.

Mr. and Mrs. Hugh Pendexter and son of Rochester, N. Y., came Tuesday to spend the summer with Mrs. Pendexter's parents, Mr. and Mrs. F. W. Faunce.

Oxford lodge, F. & A. M., has received an invitation from Jefferson lodge of Bryant Pond to visit them on Tuesday evening and will leave Norway at 7 p. m., by special train.

The Browning club met with Ellie Swan, Monday evening. The reading of the evening was from Stockard's lectures by Mrs. F. Whitman and Mrs. J. Danforth. The next meeting will be with Mrs. James Danforth.

Carrie Tucker has received word of the sudden death on Wednesday, May 18, of her uncle, Arthur E. Denison of Boston. He was the son of Lucius I. Denison and formerly lived in Norway, where he leaves many friends.

The high school intend to repeat the drama, "The Country Minister," on Monday night, May 30, for the benefit of the Athletic Association. The proceeds will be used to pay for the new uniforms. The cast will be the same as when it was first played with the exception of the part of Deacon Porter, which will be filled by Harold Anderson.

The long heralded May 15th when the comet was to pass through the comet's tail has come and gone. Curiosity got the better of us and we set the alarm at 11.30 as a good time to see it. The moon was shining brightly and the stars that could be seen above the moon's rays looked as usual under such conditions, but there was no sign of the comet's tail or anything unusual. Did anyone see the tail when we passed through?

Roland Crockett, the little six-year-old son of Mr. and Mrs. Levi Crockett, died at the home of his parents on Bridge street, Monday morning, after a long illness of tuberculosis, which he bore with remarkable patience for one so young. He attended the upper primary school and was a member of Allen Schuener's Sunday school class at the Universalist church. The funeral was held Tuesday afternoon at the home where his parents attended by Rev. M. C. Ward. There was an abundance of flowers from his relatives and schoolmates.

"The King of Tramps" called out a fair sized audience at the Opera House Tuesday evening. The play is one which centers around an old peasant, Edith Hartley, who is lured away by a villain. He tries many schemes to entrap her but his friends come to the rescue and she is freed from a horrible death. The closing scene is at the home of her true love, where she is joined by the villain in taking into custody. The specialties consist of vocal solos and a trombone solo. The street parade took place at noon headed by the band.

Attention has been called to the fact that boys have been catching fish which perch in the lake and it should be remembered that the law is on these boys. Just let them and that they lay the selves liable if they catch them during closed time. Another point regarding bass. Many have been catching bass which are under size. The law has established the length to be 10 inches and anyone less than that is illegal. It is not because is breaking the law and is himself liable. These laws are made for the good of all and should be obeyed and by so doing the lake will be good fishing.
